

Morley Machine Tool Alignment is seeking an experienced CNC Machine Repair Technician

Morley Machine Tool Alignment the leading Metrology and Service company in the Northwest providing precision measurement services and solutions using the most up to date Metrology and CNC technologies.

As a CNC Machine Repair Technician, you will be responsible for installing, maintaining, calibrating, troubleshooting and repairing production and building equipment, including but not limited to Multi-Axis CNC.

Essential Functions:

- From specifications, written and oral instructions, install, adjust, maintain, repair, modify and troubleshoot all equipment used in the manufacturing operation.
- Observe, investigate and diagnose malfunctions and take appropriate corrective actions.
- Respond to maintenance requests; maintain records of all work performed.
- Contribute to the preparation of bid specifications for routine service, repairs, and capital projects.
- Maintain a clean and orderly work area.
- Familiarity with both manual and CNC machine tool installations are beneficial.
- Provide technical instruction and assistance to clients at client sites.
- Study blueprints, sketches, drawing, manuals specifications or sample part to determine dimensions and tolerance.
- Use drawings, specs, and/or verbal instructions as well as exercising judgment and experience to plan and accomplish goals.
- Meet deadlines and document progress.
- Must be flexible, dependable, time conscious, and be able to move from project to project with minimal supervision.
- Must work close with shop and customer management.
- Will be required to work both independently and within a team environment.

Working Conditions:

- Required to travel to customer site to assist in the installation/start-up and final machine acceptance.
- Most work within the Northwest, overnight travel typically less than 25%
- Required to lift 50 pounds.
- Required to be on your feet for most of the day

Knowledge, Skills and Abilities:

- Must be detail oriented, and self-starter who can work with minimum supervision.
- Must have good math skills (trigonometry) to calculate dimensions.
- Excellent verbal and written communication skills.
- Able to multitask, prioritize, show extreme resourcefulness and problem-solving skills, and perform well under pressure.

Minimum Qualifications:

- A minimum of two years of work related CNC Machine Repair Technician experience
- Must have a valid passport and must be able to travel to Mexico and Canada, and have a valid driver's license.
- Ability to pass a drug screen and pass a background and motor vehicle (Driver's License) check

Job Type: Full-time
